If the bondholders consent to this arrangement, application will be made to the next Legislature of Massachusetts for authority to create new mortgage for \$1,100,000. This will cover the onded and floating debts, and leave the corporation with a remaining debt of about \$100,000.

The Crescent City says that "all purchases of silver are now suspended as the Branch Mint, and within a few days the usual purchase of gold dust has been discontinued, for the want of legal coin to pay. The Mint, however, continues to receive dust, and on assay grants a certificate in return, which will be redeemed when in funds. There is an abundance of eliver coinage on hand, but it will not be re-ceived by depositors. Possibly after the repairs on the engine are completed, and operations in colnage resumed, there may be a transfer made to cover and pay for gold dust as heretofore."

These variations are considerably larger than those of the week preceding. With an expanded movement in discounts and deposits, the amount of spects on bond and the circulation show a contraction. The decrease in specie has been considerably larger than we have noticed for some weeks, but the great still keeps above fifteen millions. The outward movement this week will be to some extent, without the probability of requires of contraction. without the probability of receipts of consequence from any quarter. The exportation during the pre sent week will be upwards of one and a half million, only a portion of which will come from the banks. The next returns must show a reduction in the aggregate of specie on hand.
